Your clinic students experience for students to learn how to put theory into practice.

Jaiyesi Institute of Information Technology (JNCST) of Osun State, Nigeria has partnered with York University in Canada to launch a new undergraduate program in Information Security.

Applications are now open for the new Bachelor of Information Security (BInfoSec) program, which is the first of its kind in Nigeria. The program is designed to prepare students for careers in information security and technology, with a focus on providing them with the skills and knowledge needed to address the growing demand for professionals in this field.

The program will be offered at the Jaiyesi Institute of Information Technology (JNCST) in Osun State, Nigeria, and will be delivered in collaboration with York University in Canada. Students will receive a joint degree from both institutions, which will be recognized internationally.

The program will cover a wide range of topics, including cybersecurity, network security, digital forensics, and ethical hacking. Students will also have the opportunity to engage in hands-on projects and case studies, working with real-world data and scenarios.

The program is being led by Dr. Andrew Parnaby, head of the Information Security and Technology Management program at York University, and Dr. Biodun Olatunji, head of the Information Security program at Jaiyesi Institute of Information Technology (JNCST).

The program aims to prepare graduates who can take on leadership roles in information security and technology, and who can contribute to the development of secure and reliable information systems.

Students who complete the program will be well-equipped to pursue careers in a range of industries, including finance, government, healthcare, and technology.

The program will be delivered over four years, with students completing a combination of theoretical and practical coursework. This will include a mix of lectures, seminars, and hands-on laboratory work.

Students will also have the opportunity to engage in research projects, working with faculty members on topics that are of interest to them.

The program is designed to be accessible to students from a variety of backgrounds, with a focus on providing them with the skills and knowledge needed to succeed in the rapidly evolving field of information security and technology.

Registration opens on January 30, 2018, and the first intake will be in September 2018.

Applications are now open, and interested candidates are encouraged to apply early to ensure that they have the opportunity to secure a place in the program.

The program is being delivered in collaboration with York University in Canada, which is widely recognized as a leader in the field of information security and technology.

The program is also being delivered in collaboration with Jaiyesi Institute of Information Technology (JNCST), which is a well-respected institution in Nigeria.
